

Welcome to AP Environmental Science for 2011- 2012 ! Summer Assignment

AP Environmental Science, or APES as it is commonly referred to, is the study of the environment and the role humans play in that environment. Major topics include: basic scientific principles, human populations, pollution, biodiversity, conservation, and the environment and society. This is an Advanced Placement (AP) course.

You will need to check out the textbook; Living In The Environment: Principles, Connections, and Solutions 12th Edition by Miller, from the Golden Valley library to be able to complete these assignments. You should do this in June (8am - 12:30) as there will be no one in the library in July, or during the last few weeks of May.

The summer assignment can be found on my website beginning June 1st. You can access my website from :

GVHS Teacher Directory

or by using

<http://teacherweb.com/CA/GoldenValleyHighSchool/Werts/apt1.aspx>

- There will be a quiz covering the summer material on the 1st day of school.
- The summer assignment is due on the first day of school, and I will not accept any late assignments after the 3rd day of school.
